MESSAGE

Timely and accurate agricultural statistics is a central support to design policies for development of agriculture sector as well as for eradication of poverty of food security. Agriculture is the most important component of food security of the country. Maintaining the necessary statistics pertaining to food and agriculture sector is the principal objective in the direction to achieve this national goal that greatly helps the researchers, academia and policy makers. Since 1968 the Economic Wing of defunct Ministry of Food, Agriculture & Livestock is compiling and publishing the Agriculture Statistics of Pakistan on yearly basis to facilitate policy makers and researchers dealing with agriculture. This publication is a part of concerted effort to provide concrete basis for research in the field of agriculture and it contains data regarding production, consumption, prices, import and export of food grains. The best feature of 51st edition of this publication is its comprehensiveness that it provides all sorts of data relating to agriculture sector of the country which includes area, production and yield of crops. The data for the earlier period commencing from 2000-2001 through 2017-18 has also been provided for supporting time series analysis. I express my deep appreciation for the officers and staff of the Economic Wing and also those involved in collection and compilation of data for this edition including Federal and Provincial organizations.

I hope that the publication will serve as useful reference document on the subject. Any productive criticism and suggestions to improve the publication are always welcome.

Dr. Muhammad Hashim Popalzai
Secretary

Islamabad
July, 2019

FOREWORD

Agriculture is the mainstay of Pakistan's economy accounting for 18.9 percent of the gross domestic product, employing 42.3 percent of the labor force and providing raw material of several value-added security sectors. It thus plays a central role in national development. food security and poverty reduction. The agriculture sector is the major contributor in the overall export earnings of Pakistan. A large portion of the country's manufactured exports are dependent on raw material such as cotton equally important for industrial development. Out of about 5000 industrial establishments in Pakistan, about 60 percent are agro-based. According to FAO ranking Pakistan is the 4th largest producer of cotton, 5th in sugarcane, 8th in wheat, 10th in rice; and fourth largest producer in the world of milk production.

This publication "Agricultural Statistics of Pakistan" is aimed at providing area, production and also per hectare yield data about major and minor crops. The data relating to fruit such as citrus, mangoes, etc. and major condiments/vegetables such as onions and potatoes etc. has also been added. It also contains land use statistic including the details of irrigated, non-irrigate areas and farm size. The data about agricultural inputs i.e. improved seeds. Fertilizers. Water, pesticides, rainfall data relating to disbursement of agricultural credit by Commercial Banks, ZTBL, PPCBI, and domestic private banks is also documented in this publication. The data pertaining to agricultural machinery, lift pumps, tube wells and tractors according to horsepower, farm size as well as private/public ownership is also part of this publication. Being integral part of agricultural system the publication contains data on livestock population in the country along with estimated production of milk, meat, eggs and other livestock products. It also provides data inland and marine fish production and details of fishing crafts. Part of the publication also covers trade statistic relating to major exports and imports of agricultural commodities. In addition, it provides details of procurement/support and intervention prices as well as wholesale prices of various important crops such as wheat, cotton, sugarcane and maize besides rates of diesel, electricity & petroleum products. The data provided on per capita availability of cereals, edible oil, meat, fish and milk alongwith estimates of GDP add value to this publication.

The publication is also available at M/o NFS&'s website www.mnfsr.gov.pk Economic Wing M/o NFS&R may be contacted for any additional information/suggestion for improvement.

(Dr. Muhammad Ali Talpur)
Economic Consultant

N.B: Area of wheat crop for the year 2017-18 showed a decrease of 1.95% over the previous year. Area decreased due to promotion campaign of oil seed launched by government caused reduction in wheat area. 2- Late commence of sugarcane mills also checked the acreage of wheat. availability of water, seed and harvesting of cotton crop within a time. Production of wheat crop showed an decrease of 5.9% over the last year, which is attributed to:-

- (i) Crop was sown at appropriate time and available moisture particularly in barani tract supported germination/growth.
- (ii) Intermittent rains and moderate temperature proved beneficial for healthy grain formation.
- (iii) Availability of inputs remained adequate.

N.B: Area and production of Rice crop for the year 2017-18 showed a increase of 6.4% and respectively, over the last year. decrease in area is due to less economic return to the growers of last year crop restricted the acreage of rice crop, area shifted to fodder and other competitive crops. In Sindh the area decrease due to strictly implementation of rice restriction cultivation ordinance 1959 in left bank districts of Indus River and damage of rice nursery due to heavy rains. The production showed a increase of 8.7% over the previous year which is due to corresponding decrease in area.

N.B: Area of maize crop for the year 2017-18 showed an decrease of 7.1% over the last year, which is due to good economic returns received by the growers, shifting of cotton crop into maize crop. The production showed an decrease of 3.7% which is attributed to corresponding decrease in area and favorable weather condition.

N.B: Area of sugarcane crop for the year 2017-18 showed a increase of 10.2% over the previous year which is due to:-

i. Disposal problems of cane and payment difficulties restricted the acreage of sugarcane crop

ii. Shifting of sugarcane crop area to other competitive crop (maize and fodder)

While the produce of sugarcane crop showed an increase of 8.80% over the last year which is due to favorable weather condition, and in Sindh province the production increase due to adequate availability of water.

N.B: Area of cotton crop for the year 2017-18 showed an increase of 8.5% over the last year, which is due:

- i) Better economic return received by the growers during last year crop
- ii) Promotion campaign of cotton by the Government also encouraged the farmer to put more area under cotton crop.

Production showed an increase of 12% over the last year, which is due to:-

- i. corresponding increase in area,
- ii. adoption of good management practices

* = Nominal. P = Provisional Source:- Provincial Agriculture Departments.

GEOGRAPHICAL AREA is that area which has been surveyed and calculated by the Survey of Pakistan.

TOTAL AREA REPORTED is the total physical area of the village/deh, tehsil or district etc.

FOREST AREA is the area of any land classed or administered as forest under any legal enactment dealing with forests. Any cultivated area which may exist within such forest should be excluded (and shown under heading cultivated area).

AREA NOT AVAILABLE FOR CULTIVATION is that uncultivated area of the farm which is under farm home-steads, farm roads and other connected purposes and therefore not available for cultivation.

CULTURABLE WASTE is that uncultivated farm area which is fit for cultivation but was not cropped during the year under reference nor in the year before that.

CULTIVATED AREA is that area which was sown at least during the year under reference or during the previous year. Cultivated Area = Net Area sown + Current Fallow

CURRENT FALLOW is that area which is vacant during the year under reference but was sown at least once during the previous year.

NET AREA SOWN is that area which is sown at least once during (Kharif & Rabi) the year under reference.

AREA SOWN MORE THAN ONCE is the difference between the total cropped area and the net area sown.

TOTAL CROPPED AREA means the aggregate area of crops raised in a farm during the year under reference including the area under fruit trees.

N.B. Vegetables include Potatoes.

Food Crops = Wheat, Rice, Jowar, Maize, Bajra and Barley.

Cash crops = Sugarcane, Cotton, Tobacco, S.beet, Jute and Guarseed

Pulses = Gram, Mung, Mash, Masoor, Mattar, Other Kharif and Rabi Pulses.

Oilseeds = Rapeseed & Mustard, Sesamum, Groundnut, Linseed, Castorseed and other oilseeds.

Condiments = Chillies, Onion, Garlic, Coriander. Turmeric and Ginger

Source = Provincial Agriculture Departments

Note

I= Gross Production, II= Human Consumption, NA= Not available

15% of total milk production is excluded as milk sucked by young animals, 5% is excluded as wastage in transportation

Only 5% of adult female sheep and 15% of adult female goats and 50% of adult female camels

are milked for human consumption

CONVERSION FACTORS**Weights**

One pound (16. Oz)	=	0.45359 Kgs	=	0.48609 Seer.
One hundred weight(112 lbs)	=	50.80208 Kgs	=	1.361 Maunds.
One ton (2240 lbs)	=	1.01605 M.tons	=	27.22 Maunds.
			=	5.60/5.71 bales
			=	of jute/cotton
One tonne	=	0.984 Tons	=	26.792 Maunds.
Cotton bale(375 Lbs)	=	170.09 Kgs	=	4.5571 Maunds
			=	0.1674 Long ton
1 Bushel per acre	=	67.253 Kgs. per hectare		
1 Bushel	=	0.73 Maund.		
	=	29.17 Seers.		
	=	60.00 Lbs.		

Length

One inch	=	25.3999 Millimeters
One foot (12 inches)	=	0.3048 Meter
One yard (3 feet)	=	0.9144 Meter
One mile (1760 yards)	=	1.60934 Kilometers

Square Measures

One square yard	=	Nine Square Feet	=	0.83613 Square Meter
One acre	=	4840 Square Yards	=	0.40468 Hectares
One square mile	=	640 Acres	=	258.99842 Hectare
One square kilometer	=		=	0.3861 Square Mile
One Hectare	=		=	2.4711 Acres
One Cubic Meter	=		=	2.4711 Acres/ (35.3147 Cubic Feet)

Liquid

One imperial gallon	=	4.5461 litres or 1.2 U.S gallons
One U.S. gallon	=	3.7853 litres.

GENERAL CONVERSIONS

<u>Divide</u>	<u>By Factor</u>	<u>To obtain</u>
Acres	2.4711	Hectares
Long ton	0.9842	M.tons
Cotton bales (375 lbs)	5.973	Long tons
Cotton bales (375 lbs)	5.879	M.tons
Maunds	26.79	M.tons
Price per 40 kgs.	1.0716	Price/maund
Yield kgs per hect.	92.2313	Yield maunds/acre.
Rice	0.666	Paddy
Cotton Lint	0.333	Seed Cotton

N.B.- In case of vice-versa multiply with the factor.
